

Basic Counting

We really need to hit these numbers to cover all our bases.

1. A_{67} = Sum of regular stage numbers containing Generation II Grass-type Pokémon in Pokemon Shuffle
2. B_{50} = Number of Voltorbs that can fit in a cubic lattice pattern inside a 20-foot cube
3. C_{47} = National Pokédex number of the Pokémon whose name, when stripped of all characters except 0 to 9 and a to f and interpreted as a hexadecimal number, gives the highest value
4. D_{208} = Sum of the National Pokédex numbers of the five consecutive Pokémon whose BSTs sum to a power of 2
5. E_{46} = Payout, in Pokédollars, upon winning against the only female Backpacker to use a party of four Pokémon
6. F_{55} = (Number of sets carrying the most common item in the Crystal Battle Tower) \times (Number of sets carrying the fourth-most common move in the Crystal Battle Tower)
7. G_{54} = Temperature, in degrees F, that a Fire-type starter Pokémon emits fireballs at
8. H_{30} = National Pokédex number of the Pokémon whose Area 03 stage in Pokémon Picross awards a Mural Tile when Cross Reveal is used at least once
9. I_{34} = Pokémon Adventures round number featuring the Pokémon whose National Pokédex number is equal to its BST
10. J_{16} = Index number of a golden rare Solgaleo GX
11. K_{17} = Episode number of the only Johto League anime episode to be banned
12. L_{111} = Year in which Ash and friends visit LaRousse City in the anime
13. M_{25} = Episode number of the anime episode whose name is an anagram of "FAIRLY PEG WITHIN"
